

1 – Last Sunday (10/07) I was called in because a tree on lot #142 split and fell, blocking Black Duck Lane. The limb was pretty big, and I had to drag it with my truck to clear the road. The owner was notified.

2 – Denny, the electrician, replaced the pedestal at lot #072, and a main breaker at lot #351. He had no luck finding parts for the pedestal at lot #353, so we will have to replace that pedestal.

3 – Davis HVAC replaced the unit at the office. He gave us a really good deal - \$3,471.00

4 – We had to have our computer IT guy come in and try to clean the PC's in the office. He did the best that he could, but said that Janice's PC needs to be replaced. He actually said that they should both be replaced, but mine is working OK since he left. Maybe we can replace Janice's now, and the other one in the next fiscal year.

5 – I called the four pool companies again. Continental said that he would have it before the meeting. Premier said that he would call me next week – he is at a seminar, and wouldn't be in his office until then. Trond's and Best Aquatics have not gotten back to me yet.
