

**LIGHTS** - Ed Webb had Doug replace the lights on the entrance sign, and the flag lights at the marina. Ed advised me of three street lights that are out. I only have two in stock, so when the others come in I will contact the electrician.

**BATH HOUSES** - I had Doug put DRANO down the drain in bath house #1 ladies shower. He ran the showers and said it seems to be OK.

**POOL** - County Health inspector came to check the pool. Everything was OK.

- I met with Denny (electrician) about the pool lights, and the street light in the corner (with the cameras). He will be back during the week to take a look at the pool light circuit. As far as the street light, he suggests running an outside conduit along the fence (rather than digging a ditch). He is going to see if he can get power from the light circuit in the gazebo by the fence.

**SEWAGE** - was a complaint of a sewage smell on Ocean Oval. The pumps are working OK, and I checked it three times during the day – nothing unusual noticed.

**WILLIES WAY** (Sidewalk to Boat Slips) – marbles have been removed and sidewalk patched.
