

1 – There was a water leak reported in bath house #3. It only leaks when one particular machine drains. I happened to be there a few times when the machines were emptying, and saw nothing; but there is a water mark that runs from the middle washer to the floor drain. I will have to run the machine to determine if it is the machine or a pipe leaking.

2 – Joe installed the street sign on Assawoman Lane.

3 – Joe took the screen door off of bath house #1 laundry room. One of the screens was ripped, and the bottom of the door scrapes.

4 – I met with Tracy from Advanced Security. He showed me the best locations for the pole to install the boatyard cameras. I gave this information to Ed Webb. Once we decide on a location, I will get things started.

5 – I got an e-mail from Rayne's. They are hoping to start on the drain pipe on Tuesday 9/4. They even dropped off a piece of equipment. Keep your fingers crossed for good weather.
