

SNOW REMOVAL POLICY adopted in 2021

Snow removal efforts will go into effect when predictions call for snowfall greater than or equal to 4 inches in the 21811 zip code.

SNOW REMOVAL PROCEDURE adopted in 2021

- 1) Put markers out to mark all speed bumps
- 2) Be sure that any water shut off valves, that can be protected on the roadway, are protected in the best possible way.
- 3) Clear all drainage areas throughout the community
- 4) Keep a close eye on trees covered with snow, for safety of property and pedestrians
- 5) 0-4 inches do nothing
- 6) 4-6 inches- handle in house with front end loader
- 7) 6+ inches -sub-contractor.

-No worries about salt unless there is freezing rain.

Order a skid of salt and load it as necessary

**We have approximately 4 miles of road, the Kubota has a 4' span and will need to cut through in 3 separate passes for a 12' clearance of 2 cars. Plowing once down each street should be significant for clearance. Snow overage can be put in first available common area.
